## Antifoul

### SEAJET 030 WARRIOR ANTIFOUL

SEAJET 030 Warrior is a self-polishing antifouling paint suitable for all types of pleasure craft. Seajet 030 Warrior is suitable for drying moorings.

#### Product Codes

SEAJET 030 WARRIOR BLACK 2.5L	SJ-691CR0013-2
SEAJET 030 WARRIOR BLUE 2.5L	SJ-691CR6910-2
SEAJET 030 WARRIOR RED 2.5L	SJ-691CR2291-2

### SEAJET 031 SAMURAI ANTIFOUL

SEAJET 031 Samurai is a performance antifoul for all types of pleasure craft. SEAJET 031 Samurai is suitable for all boats up to 40 knots. It has great coverage, 9-10 square metres per litre. Based on Seajet's award winning technology, SEAJET 031 Samurai has a hydration mechanism for controlled self-polishing action.

#### Product Codes

SEAJET 031 SAMURAI ANTIFOUL BLACK 2.5L	SJ-667VR0013-2
SEAJET 031 SAMURAI ANTIFOUL GREEN 2.5L	SJ-667VR5125-2
SEAJET 031 SAMURAI ANTIFOUL RED 2.5L	SJ-667VR2104-2

# Paints & Coatings

## SEAJET PELLER CLEAN

SEAJET Peller Clean is an advanced and environmentally friendly foul release product. SEAJET Peller Clean contains an epoxy primer base coat and silicone top coat. SEAJET Peller Clean contains no metals making it suitable for all propellers and stern drives. One pack will cover 1m<sup>2</sup>.

### Product Codes

SEAJET PELLER CLEAN 325ML GOLDEN PRIMER SJ-601ME2936

## SEAJET PROPELLER TRIPLE PACK

SEAJET Triple-pack is designed specifically for the protection of propellers, out-drives, trim-tabs and stern gear. SEAJET Triple-pack is suitable for aluminium, aluminium-alloy and bronze substrates and contains 2-part epoxy primer system made up of a base (60% by volume) and hardener (40% by volume) mixed together prior to application. Following application of the primer, a single coat of SEAJET 034 Emperor is then applied as the final top coat. 034 Emperor is one of SEAJET's best performing, self-polishing anti-foul products designed to prevent all forms of sea growth, barnacles, slime and algae from attaching itself to the protected surface. SEAJET Triple-pack is the new standard for the underwater protection of props and stern gear.

### Product Codes

SEAJET PROPELLER TRIPLE PACK BLACK 0.5L	SJ-225FR0013
SEAJET PROPELLER TRIPLE PACK VOLVO PENTA DARK GREY 0.5L	SJ-225FR0257
SEAJET PROPELLER TRIPLE PACK WHITE 0.5L	SJ-225FR0020

## Primers

### SEAJET 117 PRIMER

This product is a high performance, multipurpose, two component epoxy primer suitable for both above and below waterline areas (grey only). Ideal for use on GRP hulls where up to four coats can be applied for an osmosis preventative system, as well as metal keels and the like.

### Product Codes

SEAJET 117 EPOXY PRIMER GREY 1L	SJ-249EE0273-1
SEAJET 117 EPOXY PRIMER RED 1L	SJ-249EE0608-1
SEAJET 117 EPOXY PRIMER WHITE 1L	SJ-249EE0020-1
SEAJET 117 EPOXY PRIMER COMP A GREY 1.75L (2:1)	SJ-249EE0273-A-1.75
SEAJET 117 EPOXY PRIMER COMP A WHITE 1.75L (2:1) TOP SIDE	SJ-249EE0020-A-1.75
SEAJET 117 EPOXY PRIMER COMP B 0.75L (2:1)	SJ-249EE0273-B-0.75

### SEAJET 017 EPOXY PRIMER

For bare aluminium, bronze and any alloy surfaces after abrading and degreasing. 017 Epoxy Binding System gives superior performance compared to an etch primer. Ideal as a first coat on lead keels.

### Product Codes

SEAJET 017 EPOXY PRIMER 1L	SJ-203EE0020-1
----------------------------	----------------

## SEAJET 118 HIGH BUILD EPOXY PRIMER

High build, high solids epoxy primer system which is particularly surface tolerant making it ideal for iron/steel surfaces. 118 High Build Epoxy Primer can also be used as an osmosis preventative system on GRP if 3 coats are applied.

### Product Codes

SEAJET 118 HIGH BUILD EPOXY PRIMER SJ-460JE0043-A-2.21  
COMP A 2.21L  
SEAJET 118 HIGH BUILD EPOXY PRIMER SJ-460JE0043-B-0.29  
COMP B 0.29L

## SEAJET PROPELLER PRIMER

For bare aluminium, bronze, stainless and any alloy surface after abrading and degreasing. Packed in a small 250ml tin making it ideal for priming smaller areas.

### Product Codes

SEAJET PROPELLER PRIMER TRANS 250ml SJ-236EE0313

## SEAJET 015 ACRYLIC UNDERWATER PRIMER

SEAJET 015 Underwater Primer based on a special acrylic resin, works as an excellent sealer/barrier coat over unknown, incompatible and Teflon based antifouling. It is quick drying and adheres well to subsequent coats. Quick drying with excellent adhesion to subsequent coats. It forms a tough yet flexible film.

### Product Codes

SEAJET 015 ACRYLIC UNDERWATER PRIMER SJ-255VR0043-1  
750ML  
SEAJET 015 ACRYLIC UNDERWATER PRIMER 2.5L SJ-255VR0043-2

## Top Coats

### SEAJET BRILLIANCE GLOSS

This single component, urethane alkyd paint has very high gloss retention whilst remaining easy to apply using either brush or roller. Brilliance, although a single component product, will stand up to minor bumps and scratches.

### Product Codes

SEAJET THINNER U 1L	SJ-907TM0061-1
---------------------	----------------

## Top Tops

### MARINE INDUSTRIAL BLACK TAR VARNISH

Black Tar Varnish is a traditional and rustic looking water-proof, protective coating for timber, stone, brick and metal surfaces. It was re-formulated in 2003 to be low odour, quick drying and can be used to over coat traditional weathered tar coatings. After prolonged sunlight it will weather from a gloss to a matt finish.

#### Product Codes

MARINE INDUSTRIAL BLACK TAR VARNISH 5L	MI-BTV-5
MARINE INDUSTRIAL BLACK TAR VARNISH 20L	MI-BTV-20

## Bilge Paint

### MARINE FINISH BILGE PAINT

A high quality, single component alkyd based bilge and locker paint. This product can be applied directly over GRP/ Fibreglass and wood to leave a matt finish.

#### Product Codes

MF BILGE PAINT ANTHRACITE GREY	MF-
RAL-7016 2.5L	BP4007016-2.5
MF BILGE PAINT GREY (922SP) 1L	MF-BP400GY

MF DECK PAINT NON SLIP PALE GREY RAL:00A05 5L	MF-DP30000A05-5
MF DECK PAINT NON-SLIP PASTEL BLUE RAL:5024 1L	MF-DP3005024-1
MF DECK PAINT NON-SLIP WHITE 1L	MF-DP300WE

### MARINE FINISH E-SPHERES NON-SLIP AGGREGATE

Silica e-spheres which can be added to a variety of matt and gloss paints to create a non-slip finish. For best results add no more than 40g of e-spheres to every 1L of paint.

#### Product Codes

MF E-SPHERES AGGREGATE FOR NON-SLIP	MF-DP300-SAND
-------------------------------------	---------------

## Solvents

### WHITE SPIRIT

Top quality White Spirit for cleaning of tools or thinning down petroleum based paints and varnishes.

#### Product Codes

WHITE SPIRIT 2L UN: 1300	MI-WHS-2
--------------------------	----------

### METHYLATED SPIRITS

High quality methylated spirit for cleaning and degreasing surfaces.

#### Product Codes

METHYLATED SPIRIT 500ml	MI-M-500
METHYLATED SPIRITS 5L	MI-M-5L

### GENUINE TEREbine DRIERS

A blended metallic drier which can be added to oil based paints to improve curing time in cold and damp environments. It can be added to oil based varnishes, undercoats, gloss paints etc at a maximum of 5%. Once mixed, leave product for 20 minutes before application.

#### Product Codes

GENUINE TEREbine DRIERS 250ml	MI-TEREPIN-250
-------------------------------	----------------

# Paints & Coatings

## GENUINE TURPENTINE

Genuine Turpentine is a natural product distilled from pine trees. It blends beautifully with oil based paints when thinning is required and will clean and protect expensive paint brushes much better than white spirit.

### Product Codes

GENUINE TURPENTINE 2.5L

MI-TURPS-2.5

## Oils & Preservatives

### RAW LINSEED OIL

Raw linseed oil penetrates and feeds wood leaving little or no surface coating. Its especially recommended for application to oak, where its slower drying times gives the oil more chance of soaking into the dense fibre structure. Add a small amount of White Spirit to the first coat when applying to bare timber.

### Product Codes

RAW LINSEED OIL 500ml

MI-BLO-500

## Fillers

### JOTUN FINISHING FILLER

A high density hand applied two component epoxy filler that leaves a smooth and strong surface. Good resistance to water and solvents, has very strong cohesion / adhesion properties and is more flexible than most epoxy fillers. Sandability is good with an approximate Shore D hardness of 75. It has a much lower viscosity than Lightweight Filler. Suitable for above and below water application, when part of an approved Jotun system. Normally used to finish surfaces treated with Lightweight Filler, in preparation for sealing with a solvent epoxy coating.

#### Product Codes

JOTUN FINISHING FILLER 1L

JN-F-FILLER-1

### JOTUN LIGHTWEIGHT FILLER

Lightweight Filler is an ultralight weight two-component solvent free epoxy fairing compound/filler that can be applied at very high thickness. It has minimal shrinkage (approximately 0.2%), above-average flexibility and very strong adhesion. Sandability is excellent with an approximate Shore D hardness of 50. Suitable as part of an epoxy coating system on metal, GRP or wood substrates.

#### Product Codes

JOTUN LIGHTWEIGHT FILLER COMP A 2L (1:1)

JN-LWF-A-2

JOTUN LIGHTWEIGHT FILLER COMP B 2L (1:1)

JN-LWF-B-2

### JOTUN MEGAFILLER MULTI

A complete range of lightweight, smooth and multipurpose solvent free epoxy fairing compounds perfectly formulated for filling and fairing prior to applying topcoats. The popular Jotun Megafiller Multi will not sag when applied on vertical surfaces up to 30mm, has excellent adhesion and cohesion properties and has a short dry time for sanding. Megafiller Multi can also be used both above and below the waterline.

#### Product Codes

JOTUN MEGAFILLER MULTI COMP A 10L (1:1)

JN-MFM-A-10

JOTUN MEGAFILLER MULTI COMP B 10L (1:1)

JN-MFM-B-10

### JOTUN MEGAFILLER SMOOTH

Megafiller Smooth is two pack solvent-free epoxy filler that leaves a very smooth surface. The product gives a hard film, but retains excellent sanding properties. It has a lower viscosity than Megafiller. Megafiller Smooth is suitable for above and below-water application. Normally used for refinishing surfaces treated with Megafiller, or to repair existing epoxy or polyurethane systems. Suitable as part of an epoxy coating system on metal, GRP or wood substrates.

#### Product Codes

JOTUN MEGAFILLER SMOOTH COMP A 2L (1:1)

JN-MFS-A-2

JOTUN MEGAFILLER SMOOTH COMP B 2L

JN-MFS-B-2

## Primers

### JOTUN MEGAPRIMER

This is a two component polyamide cured high molecular weight epoxy coating. Designed as a sandable, high build, all purpose coating. Can be used as primer or sealer for fillers in atmospheric and immersed environments. Suitable for properly prepared carbon steel, galvanised steel, shop primed steel, stainless steel, aluminium, composite and wood substrates. Typical use in exterior and interior areas, including hulls, above and below waterline, superstructures and decks. Suitable for osmosis prevention on composite hulls. To be used as a sealer on epoxy fillers and old polyurethane systems.

#### Product Codes

JOTUN MEGAPRIMER EPOXY PRIMER COMP A GREY 4L (4:1)	JN-MPRIMER-G-A-4
JOTUN MEGAPRIMER EPOXY PRIMER COMP A GREY 16L (4:1)	JN-MPRIMER-ER-A-16

JOTUN MEGAPRIMER PRIMER COMP B 1L (4:1)	JN-MPRIMER-B-1
JOTUN MEGAPRIMER PRIMER COMP B 4L (4:1)	JN-MPRIMER-B-4

### JOTUN MEGAPRIMER LITE

This is a two component polyamide cured epoxy coating. Designed as a fast drying, sandable finishing primer. Can be used as primer as a part of a complete system in atmospheric and immersed environments. Typical use in exterior and interior areas, including hulls, above and below waterline, superstructures and decks. To be used as finish primer under Megagloss range of products. Suitable for properly prepared carbon steel, stainless steel, aluminum, composite and coated surfaces as epoxy systems and polyurethane systems. Can be used as primer or sealer for fillers in atmospheric and immersed environments

#### Product Codes

## Top Coats

### JOTUN MEGAGLOSS AC

This is a high gloss, two component, high solids acrylic polyurethane topcoat with very good abrasion resistance and excellent gloss and colour retention. Specially formulated for easy application on top-class yachts and provides a finish that can be polished, if required. Recommended as a topcoat over an epoxy coating system where a durable high gloss finish is required in aggressive atmospheric exposure. Can be used on yachts and polished if polishing is unavoidable and required. The Jotun Megagloss AC paints can be tinted to many BS, RAL and Jotun colours.

### Product Codes

JOTUN MEGAGLOSS AC BASE 1 COMP A 2L (4:1)	JN-MGLOS-SAC1-A-2
JOTUN MEGAGLOSS AC BASE 2 COMP A 2L (4:1)	JN-MGLOS-SAC2-A-2

JOTUN MEGAGLOSS AC COMP B 0.5L (4:1)	JN-MGLOS-SAC-B-0.5

### JOTUN MEGAGLOSS HG

With outstanding abrasion resistance, excellent gloss and colour retention and very good flexibility, MegaGloss HG is specially formulated for the yacht owner seeking the perfect finish. MegaGloss HG meets the demands of both owners and applicators with an unrivaled mirror-like finish that will last and last in the most aggressive atmospheric conditions. The Jotun Megagloss HG paints can be tinted to many BS, RAL and Jotun colours.

## JOTUN JOTAMASTIC 80

This is a two component polyamine cured epoxy mastic coating. It is a surface tolerant, high solids product. Specially designed for areas where optimum surface preparation is not possible or desired. Can be used as primer, a mid coat or as single coat system in atmospheric environments. Suitable for properly prepared carbon steel and aged coating surfaces. It can be applied at sub zero surface temperatures when used with the winter grade hardener. If exposed to sunlight chalking may occur. All JOTUN Marine products are for professional application only, not for resale or retail use. These products are not suitable for yachts or pleasure vessels!

### Product Codes

## JOTUN JOTAMASTIC 90

This is a two component, surface tolerant, abrasion resistant, high solids, polyamine cured epoxy mastic coating which may be applied in a wide range of film thicknesses. This product is part of a complete system which is certified not to spread flames. Recommended for use on steel where blast cleaning may not be possible and on hydrojetted surfaces still being moist. Gives excellent corrosion protection both in salt and fresh water. If exposed to sunlight chalking may occur. Jotun Jotamastic 90 can also be tinted. All JOTUN Marine products are for professional application only, not for resale or retail use. These products are not suitable for yachts or pleasure vessels!

### Product Codes

## JOTUN ALKYD PRIMER

A one component oxidatively drying alkyd coating. Can be used as primer or mid coat in atmospheric environments. Suitable for properly prepared carbon steel, aluminium and wooden substrates. All JOTUN Marine products are for professional application only, not for resale or retail use. These products are not suitable for yachts or pleasure vessels!

### Product Codes

JOTUN ALKYD PRIMER BLACK 5L	JN-ALKYD-BK-5
JOTUN ALKYD PRIMER GREY 5L	JN-ALKYD-G-5
JOTUN ALKYD PRIMER WHITE 5L	JN-ALKYD-W-5

# Paints & Coatings

## JOTUN PILOT QD PRIMER

Pilot QD Primer can be applied to steel, aluminium or wood, and features very good adhesion properties on all these substrates. Expect a fast drying, easy to apply primer with good anticorrosive properties. All JOTUN Marine products are for professional application only, not for resale or retail use.

### Product Codes

JOTUN PILOT QD PRIMER LIGHT GREY 5L	JN-PQD-5GY
JOTUN PILOT QD PRIMER GREY 20L	JN-PQD-GY

## JOTUN MUKI EPS

Jotun Muki EPS is a two component chemically curing epoxy coating. It is a shop primer designed for high welding and cutting speed, giving reduced weld porosity and back burning. It is fast drying making it suitable for stacking shortly after application. Can be used as temporary primer in a new construction phase, as holding primer or as primer in a complete coating system in atmospheric and immersed environments. Suitable for properly prepared carbon steel substrates and recommended to be applied in an automated shop priming line in lower film thicknesses or applied by airless spray when used as holding primer. Compatible with advanced welding technologies including MIG, MAG and G-FCAW when applied in low film thickness. All JOTUN Marine products are for professional application only, not for resale or retail use.

### Product Codes

JOTUN MUKI EPS RED COMP A 18L	JN-MUKI-EPS-R-A-18
JOTUN MUKI EPS COMP B 0.5L	JN-MUKI-EPS-B-0.5

## JOTUN PENGUARD EXPRESS

This is a two component amine cured epoxy coating. It is a fast drying, high solids, high build product. Specially designed for new construction where short dry to handle and over coating times are required. Can be used as primer, mid coat, finish coat or as single coat system in atmospheric environments. Suitable for properly prepared carbon steel, aluminium, concrete and galvanised steel substrates. It can be applied at sub zero surface temperatures.

### Product Codes

JOTUN PENGUARD EXPRESS COMP A GREY 4L (4:1)	JN-PGEX-A-GY-4
JOTUN PENGUARD EXPRESS COMP B 1L	JN-PGEX-B-1

## JOTUN PENGUARD HB

This is a two component, polyamide cured, high molecular weight epoxy coating. Designed as a primer for new construction. Can be used as primer as a part of a complete system in atmospheric and immersed environments. Suitable for properly prepared carbon steel, stainless steel, aluminium, concrete, galvanised steel, shop primed steel and thermally sprayed zinc substrates. Suitable for structural steel and piping to be exposed to corrosive environments up to very high and immersed. Recommended for offshore environments, refineries, power plants, bridges, buildings and mining equipment. All JOTUN Marine products are for professional application only, not for resale or retail use. These products are not suitable for yachts or pleasure vessels!

### Product Codes

## Antiskid

### JOTUN ANTISKID

JOTUN Anti-Skid is aluminium oxide grains, intended to be spread into the last coat in a non-skid system. Available in extra coarse, coarse, medium and fine particle sizes. For use on decks, floors, gangways and other areas where additional friction properties are required. The spreading is to take place in the wet film during application. Recommended quantity: Fine particle size (180 - 250 µm) for coatings applied in 50 to 150 µm DFT, such as topcoats. The recommended usage is 1,5 - 2,0 kg per 10 litres of paint. Medium particle size (400 - 600 µm) for coatings applied in 150 to 400 µm DFT, such as Jotamastic products and thick film topcoats. The recommended usage is 2,5 - 3,3 kg per 10 litres of paint. Coarse particle size (700 - 1000 µm) for coatings applied in 400 to 1500 µm DFT, such as Baltoflake products. The recommended usage is 3,0 - 4,0 kg per 10 litres of paint. All JOTUN Marine products are for professional application only, not for resale or retail use. These products are not suitable for yachts or pleasure vessels!

### Product Codes

JOTUN ANTISKID FINE 3KG	JN-AS-F-3
JOTUN ANTISKID MEDIUM 3KG	JN-AS-M-3
JOTUN ANTISKID COARSE 3KG	JN-AS-C-3

### JOTUN SEAFORCE 30

This is a one component acrylic, hydrolysing antifouling coating based on ion exchange technology. It provides good fouling protection. This is achieved through self polishing characteristics reducing hull deterioration. To be used as finish coat in immersed environments only. Suitable on approved primers and tie coats on aluminium and carbon steel substrates. It can be applied at sub zero surface temperatures. Recommended for under water hull in new-building and drydocking. Designed for vessels trading at a wide range of speed and activity. The product can be used for long service periods up to 60 months as a part of a complete coating system. Can be used for offshore constructions and outside hull for static installations in deep sea.

### Product Codes

JOTUN SEAFORCE 30 BLACK 5L	JN-SF30-BK-5
JOTUN SEAFORCE 30 BLACK 20L	JN-SF30-BK-20
JOTUN SEAFORCE 30 BLUE 5L	JN-SF30-BL-5
JOTUN SEAFORCE 30 DARK RED 5L	JN-SF30-DR-5
JOTUN SEAFORCE 30 LIGHT RED 5L	JN-SF30-LR-5
JOTUN SEAFORCE 30 LIGHT RED 20L	JN-SF30-LR-20

## Additives

### JOTUN PENGUARD LOW TEMP ADDITIVE

JOTUN Penguard low temperature additive is an additive for improved low temperature curing of the following products: Penguard HB, Penguard Primer. Add 2 % (0.4 litre) to a 20 litre mixed. JOTUN Penguard low temperature additive is an additive is recommended when a faster curing or painting at lower substrate temperatures is desired. All JOTUN Marine products are for professional application only, not for resale or retail use.

#### Product Codes

JOTUN PENGUARD LOW TEMP ADDITIVE 400ML JN-PGLTA-400

### JOTUN THINNERS No.2

Thinners No.2 is a general use thinner for most conventional alkyd or oil based paints. Thinners No. 2 is the solvent base for Pilot II.

#### Product Codes

JOTUN THINNERS No.2 1L JN-TH2-1  
JOTUN THINNERS No.2 5L JN-TH2-5

### JOTUN THINNERS No. 7

This is a paint thinner. Designed to improve the flow of a range of Jotun acrylic, vinyl and antifouling coatings. Can also be used as cleaner for pumps and tools before and after painting. Recommended usage as per the specific datasheet or application guide of the product one wish to apply.

#### Product Codes

JOTUN THINNERS No: 7 FOR ANTIFOULINGS & VINYL JN-TH7-1  
JOTUN THINNERS No: 7 FOR ANTIFOULINGS & VINYL JN-TH7-5

### JOTUN THINNERS NO.10

Solvent thinner. Thinner for polyurethane or similar paint products.

#### Product Codes

JOTUN THINNERS NO. 10. 5L JN-TH10-5

### JOTUN THINNERS No. 12

A high quality solvent with a slow rate of evaporation. Generally, for improving the flow and levelling properties of MegaGloss products by slowing solvent evaporation/drying. Particularly suitable for brushing/rolling MegaGloss. May be blended with Thinners No. 18 and used when spraying MegaGloss in hot conditions.

#### Product Codes

JOTUN THINNERS No: 12 FOR P.U. SLOW EVAPO- RATION 1L JN-TH12-1

### JOTUN THINNERS No.17

Thinners No.17 is a solvent thinner. Recommended thinner for epoxies and similar paint products. Thinners No 17 is the solvent base for Jotamastic. This thinners can also be used with the MegaPrimer, MegaCote and AntiPest Primers.

#### Product Codes

JOTUN THINNERS No: 17 FOR EPOXY COATINGS JN-TH17-1  
JOTUN THINNERS No: 17 FOR EPOXY COATINGS JN-TH17-5  
JOTUN THINNERS No: 17 FOR EPOXY COATINGS JN-TH17-20

# Paints & Coatings

## JOTUN THINNERS No.18

A high quality solvent with a medium rate of evaporation. For improving flow and levelling properties when spraying Megagloss in average/moderate temperature conditions.

### Product Codes

JOTUN THINNERS No: 18 FOR P.U. MEDIUM EVAPORATION	JN-TH18-1
JOTUN THINNERS No: 18 FOR P.U. MEDIUM EVAPORATION	JN-TH18-5

## JOTUN THINNERS No.19

A high quality solvent with a fast rate of evaporation. Use for improving flow and levelling properties when spraying Megagloss in cold temperatures. May be blended with Thinners No. 18 when spraying in more moderate conditions. Thinners No. 19 is not suitable for brush/roller applications.

### Product Codes

JOTUN THINNERS No: 19 FOR P.U. FAST EVAPORATION	JN-TH19-1
JOTUN THINNERS No: 19 FOR P.U. FAST EVAPORATION	JN-TH19-5

## Deks Olje System

### OWATROL DEKS OLJE D1

OWATROL Deks Olje D1 is a uniquely penetrating wood oil that is high in solids and is able to get deep into the grain of woods where it dries, stays and sets. Used on its own OWATROL Deks Olje D1 needs occasional topping up of the surface as UV light and water wear it out. Deks Olje D2, or other UV varnishes, can be directly applied on top of OWATROL Deks Olje D1 to create a long lasting deep gloss finish.

### Product Codes

DEKS OLJE D1 1L	GN-D1-1
DEKS OLJE D1 2.5L	GN-D1-2.5
DEKS OLJE D1 20L	GN-D1-20

### OWATROL DEKS OLJE D2

OWATROL Deks Olje D2 is a high gloss varnish-like flexible finish which gives all types of woods a deep rich shine. OWATROL Deks Olje D2 is applied to woods which are already fully saturated with D1, the two combine to give a long lasting finish.

### Product Codes

DEKS OLJE D2 1L	GN-D2-1
DEKS OLJE D2 2.5L	GN-D2-2.5
DEKS OLJE D2 20L	GN-D2-20

## Oils

### OWATROL MARINE OIL

Marine Oil is a versatile, highly penetrating air drying oil that can be used alone or added to paint. Used alone it provides a tough, flexible finish, driving out excess moisture and air; displacing it from rusted metal, so stopping rust. Used alone on porous wood surfaces it will saturate and protect the wood from damage caused by moisture and prevent paint from peeling. Added to any oil or alkyd based coatings Marine Oil will give increased wet edge time, improved flow ability, greater adhesion and unlike damaging thinners, will maintain the inherent quality of the paint without affecting its appearance or drying times.

#### Product Codes

OWATROL MARINE OIL 500ML	GN-OWAT-500ML
OWATROL MARINE OIL 1L	GN-OWAT-1L
OWATROL MARINE OIL 5L	GN-OWAT-5L
OWATROL MARINE OIL 20L	GN-OWATROL-20

## Paint Remover

### OWATROL MARINE STRIP

OWATROL Dilunett Paint Remover, solvent free, can remove up to 10 coats in just one application, removing everything from antifouling to varnishes and most gloss paint systems. Easy to apply, OWATROL Dilunett Paint Remover is a gel which can be applied to vertical surfaces without sagging. To use, simply brush on the OWATROL Dilunett Paint Remover and leave until the surface turns dark brown then remove.

#### Product Codes

MARINE STRIP 1L	GN-DIL-1
MARINE STRIP 2.5L	GN-DIL-2.5

## Wood Cleaners

### OWATROL DECK CLEANER

Deck Cleaner is a powerful cleaner and brightener that removes ground in and surface dirt while restoring a bright, vibrant look to fibreglass and grey, weather-beaten marine wood such as teak and mahogany that is unfinished, to its natural colour without bleaching. Unlike bleach or chlorine based cleaners, Deck Cleaner will not damage the woods fibres. Deck Cleaner is fast acting and can restore the original colour of your wood surface in as little as 20 minutes with no laborious and backbreaking sanding! It is safe to use on all wood species including teak, iroko, mahogany, oak, larch and pine and is also an excellent degreaser for use on tropical hardwoods to allow finishes like Dek's Olje D1 to penetrate. Deck Cleaner can remove rust stains and will also neutralise wood surfaces which have been stripped with a stripping product such as OWATROL Marine Strip, leaving the surface ready for applying your chosen finish. Deck Cleaner can also be used to restore the lustre to faded plastics and fibreglass dulled by weathering and UV rays.

#### Product Codes

OWATROL DECK CLEANER 1L	GN-NET-1
OWATROL DECK CLEANER 2.5	GN-NET-2.5
OWATROL DECK CLEANER 15L	GN-NET-15

## EPIFANES PU PRIMER

Two component semi gloss polyurethane primer/ undercoat. Provides smooth pinhole free surface prior to topcoating with high gloss Epifanes polyurethane topcoat. Quick drying, medium filling and excellent sandibility. Provides a perfect flow and easy application by brush, roller or spray. GRP - Suitable as filling undercoat for interior and exterior on bare fibreglass. Also for use on existing polyurethane based finishes or on epoxy based systems above the waterline for fresh and salt water. Additional colours are available upon request, please contact the office for more information.

EPIFANES EPOXY PRIMER COMP B 0.8KG	ES-EP-B-0.8

## EPIFANES MULTICOVER EPOXY PRIMER

Very good corrosion protecting, universal 2 component epoxy primer (all-in-one) as premier coat on steel, as filling epoxy sealer and as repair primer for existing colour systems. Only suited for surfaces above the waterline. Outstanding bonding also on galvanized and non-ferrous surfaces, as well as on plywood and GRP. Very good filling and quickly drying characteristics even at low temperatures.

### Product Codes

EPIFANES MULTICOVER EPOXY PRIMER GREY 7.5KG COMPLETE KIT	ES-MC-GY-0.75
EPIFANES MULTICOVER EPOXY PRIMER GREY COMP A 3.2KG	ES-MC-GY-A-3.2
EPIFANES MULTICOVER EPOXY PRIMER COMP B 0.8KG	ES-MC-B-0.8

## EPIFANES PU GLOSS COMPLETE KIT

A high gloss two-component yacht paint with excellent outdoor durability and weather resistance. Scratch resistant and very long gloss retention. Provides a perfect flow and easy application by brush, roller or spray. Field of Application: GPR, Steel, Wood, Aluminium. Suited for topcoating two-component primer systems above the waterline. Also suited for epoxy resin treated surfaces. Can be applied directly on thoroughly degreased and sanded fibreglass. Intermediate coat on epoxy resins or epoxy paints prior to the application of traditional one-component paints. Additional colours are available on request, please contact the office for more information.

## Primers

### ALEXSEAL SUPER BUILD 302

ALEXSEAL Super Build 302 is an epoxy-based high build primer / surfacer which cures into a smooth easy to sand, water resistant coating. ALEXSEAL Super Build 302 has excellent spray characteristics and is fast drying to allow maximum efficiency while fairing. The cured film offers excellent mechanical resistance values. ALEXSEAL Super Build 302 is used to seal ALEXSEAL Fairing Compound 202 and to even out imperfections remaining after the filling and sanding process. It also is designed to be used as a smooth, non-porous surfacer prior to the application of ALEXSEAL Finish Primer 442.

### Product Codes

## ALEXSEAL FINISHING PRIMER 442

ALEXSEAL Finish Primer 442 is an epoxy-based finish primer offering advanced adhesion qualities over various substrates, exceptional sanding characteristics, and good film build. The products special characteristics ensure a reduction of cleaning and maintenance, while at the same time preserving the yachts appearance and value. ALEXSEAL Finish Primer 442 is designed to prime and seal old and new, properly prepared, stable surfaces such as gelcoat and fiberglass, as well as to seal other ALEXSEAL primers and filler systems. Using this primer as a base enhances the Wet Look of ALEXSEAL's Topcoats. Finish Primer 442 may be used above and below the waterline.

### Product Codes

ALEXSEAL FINISHING PRIMER 442 WHITE U.S. GALLON	MZ-P4420-G
ALEXSEAL FINISHING PRIMER 442 WHITE QUART	MZ-P4420-QRT

## ALEXSEAL FAST SPOT PRIMER 414

ALEXSEAL Fast Spot Primer 414 is an acrylic/epoxy-based fast dry and overcoat spot in finish primer with quick dry to sand characteristics. ALEXSEAL Fast Spot Primer 414 is designed to spot prime a finished primed surface where break through areas have occurred to seal exposed under lying products.

### Product Codes

ALEXSEAL FAST SPOT PRIMER 414 DARK GREY QUART	MZ-P4143-QRT
ALEXSEAL FAST SPOT PRIMER 414 SAND QUART	MZ-P4145-QRT
ALEXSEAL FAST SPOT PRIMER 414 CONVERTER QUART	MZ-C4147-QRT

## Fillers

### ALEXSEAL FAIRING FILLER 202

ALEXSEAL Fairing Compound 202 is a solvent-free, epoxy-based, light-weight filler, which provides the ideal product for yachts that require filling and fairing. ALEXSEAL Fairing Compound 202 has excellent application, sanding and anti-sagging properties. It is designed to be easy to mix and apply, while the cured film provides an excellent surface for re-coating with other ALEXSEAL Yacht Coating products.

### Product Codes

### ALEXSEAL SPRAY FAIR 328

ALEXSEAL Spray Fair 328 is an epoxy-based, sprayable filler surfacer, which provides the ideal product for yachts that require filling and fairing. ALEXSEAL Spray Fair 328 has excellent application, sanding and anti-sagging properties. It is designed to be easy to mix and apply, while the cured film provides an excellent surface for recoating with other ALEXSEAL products. ALEXSEAL Spray Fair 328 is used for fairing all appropriately prepared surfaces and can be used for surfaces above the waterline only.

### Product Codes

ALEXSEAL SPRAY FAIR 328 CONVERTOR YELLOW U.S. GALLON	MZ-C3287-G
ALEXSEAL SPRAY FAIR 328 FILLER TAN U.G. GALLON	MZ-P3280-G

## Metallic Top Coats

### ALEXSEAL METALLIC BASE

The ALEXSEAL Metallic System offers discerning yacht owners a more durable and luxurious alternative to the less than ideal automotive finishes often used in the marine market. The ALEXSEAL Metallic System provides a brilliant metallic effect, great distinction of image, and long-term UV resistance. Equally as impressive is the ease of application which translates into less time and expense involved with the application of your yachts ever-important first and lasting impressions. In addition, an aliphatic polyester polyurethane clear coat works in unison to provide the scratch and stain resistance that yachts require. This clear coat advantage is why The ALEXSEAL Metallic System performs like a single stage aliphatic polyester polyurethane while providing a superior metallic appearance. ALEXSEAL Metallic Base Coat has been designed specifically to withstand the harsh marine environment. It is formulated with a two-component basecoat that provides superior inter-coat adhesion and reduces the possibility of mottling or unevenness in the finish. In addition a two-component aliphatic polyester polyurethane is used for the final clear finish. This gives the ALEXSEAL Metallic System unsurpassed scratch and stain resistance while preventing discoloration of the clear coat. ALEXSEAL Metallic Base Coat is intended to be part of a base coat/clear coat finish combined with ALEXSEAL Premium Topcoat 501, T0125 Clear Gloss for the application of a metallic finish. It can be used internally or externally on areas of the yacht which are not subject to permanent water immersion.

## Tops Coats

### ALEXSEAL 501 TOPCOAT

ALEXSEAL Premium Topcoat 501 is a two component, polyurethane-based coating, designed for exterior and interior applications. ALEXSEAL Premium Topcoat 501 has a high gloss wet look which provides superior distinction of image. This product has been specifically developed for the yacht industry. The product's special characteristics ensure a reduction of cleaning and maintenance, while at the same time preserving the yacht's appearance and value. After curing, ALEXSEAL Premium Topcoat 501 offers excellent gloss and color stability values, even under extreme climatic conditions. Additionally the material is highly resistant to UV rays, salt water, abrasion and fuel. ALEXSEAL Premium Topcoat 501 is used as a extreme high-gloss topcoat in spray or brush applications. It can be used internally or externally in areas not subject to permanent water immersion.

## Top Coat Converters

### ALEXSEAL TOPCOAT CONVERTER

Alexseal converter for use with the Alexseal Premium Topcoat 501 and Alexseal Metallic Base Coat.

#### Product Codes

ALEXSEAL TOPCOAT CONVERTER BRUSH 1/2 U.S. GALLON MZ-C5012-0.5G

ALEXSEAL TOPCOAT CONVERTER BRUSH PINT MZ-C5012-PNT

ALEXSEAL TOPCOAT CONVERTER SPRAY U.S. GALLON MZ-C5051-G

ALEXSEAL TOPCOAT CONVERTER SPRAY QUART MZ-C5051-QRT

## Flattening Additive

### ALEXSEAL FLATTENING ADDITIVE

ALEXSEAL Flattening Additive is a matting paste for ALEXSEAL Premium Topcoat 501. This product varies the degree of gloss without reducing the mechanical properties of the topcoat. Flattening Additive is ideal to use when a lower gloss level is desired to minimize glare and surface defects. ALEXSEAL Flattening Additive may be added to any ALEXSEAL Premium Topcoat 501 color base. This product is designed for spray application. Brush application may result in an uneven flat or semi gloss finish.

#### Product Codes

ALEXSEAL FLATTENING ADDITIVE U.S. GALLON MZ-A5023-G

ALEXSEAL FLATTENING ADDITIVE QUART MZ-A5023-QRT

## Top Coat Accelerators

### ALEXSEAL TOP COAT 501 ACCELERATOR

Alexseal accelerator for use with the Alexseal 501 Top Coat.

#### Product Codes

ALEXSEAL TOP COAT 501 ACCELERATOR 4OZ MZ-A5035-4

## 302 Accelerator

### ALEXSEAL ACCELERATOR SUPER BUILD 302 EPOXY PRIMER

Alexseal accelerator for use with the Alexseal Superbuild 302 Epoxy Primer

#### Product Codes

ALEXSEAL ACCELERATOR SUPER BUILD 302 EPOXY PRIMER PINT MZ-A4030-PNT

## 442 Accelerator

### ALEXSEAL ACCELERATOR FINISH PRIMER 442 EPOXY PRIMER

Alexseal accelerator for use with the Alexseal Finish Primer 442 Primer

#### Product Codes

ALEXSEAL ACCELERATOR FINISH PRIMER 442 EPOXY PRIMER PINT MZ-A4429-PNT

## Top Coat Reducers

### ALEXSEAL TOP COAT REDUCER

Alexseal reducer for use with the Alexseal Premium Topcoat 501 and Alexseal Metallic Base Coat.

#### Product Codes

ALEXSEAL TOP COAT REDUCER BRUSH U.S. GALLON	MZ-R5015-G
ALEXSEAL TOPCOAT REDUCER BRUSH QUART	MZ-R5015-QRT
ALEXSEAL TOPCOAT REDUCER SPRAY SLOW U.S. GALLON	MZ-R5030-G
ALEXSEAL TOP COAT REDUCER SLOW QUART	MZ-R5030-QRT
ALEXSEAL TOPCOAT REDUCER SPRAY MEDIUM U.S. GALLON	MZ-R5050-G
ALEXSEAL TOPCOAT REDUCER MEDIUM QUART	MZ-R5050-QRT
ALEXSEAL TOP COAT REDUCER FAST U.S. GALLON	MZ-R5070-G
ALEXSEAL TOPCOAT REDUCER FAST QRT	MZ-R5070-QRT
ALEXSEAL TOP COAT REDUCER SUPERFAST U.S. GALLON	MZ-R5090-G
ALEXSEAL TOPCOAT REDUCER SUPERFAST QUART	MZ-R5090-QRT

## 302 Reducers

### ALEXSEAL SUPER BUILD REDUCERS

Alexseal reducer for use with the Alexseal Super Build 302

#### Product Codes

ALEXSEAL SUPER BUILD 302 EPOXY PRIMER REDUCER U.S. GALLON	MZ-R3040-G
ALEXSEAL SUPER BUILD 302 EPOXY REDUCER QUART	MZ-R3040-QRT

## 442 & 414 Reducer

### ALEXSEAL EPOXY PRIMER REDUCER

Alexseal reducer for use with the Alexseal Finish Primer 442 and Alexseal Spot Primer 414.

#### Product Codes

ALEXSEAL EPOXY PRIMER REDUCER U.S. GALLON	MZ-R4042-G
ALEXSEAL EPOXY PRIMER REDUCER QUART	MZ-R4042-QRT

## Surface Protector

### ALEXSEAL SURFACE PROTECTOR

ALEXSEAL Surface Protector is a water-based one component material that cures into a flexible coating which is used for temporary protection of painted surfaces to prevent light scratching, soiling and weather influences during construction and transport of yachts. The easy stripping of the tear-resistant protective film remains intact for up to 6 months even after ageing and accelerated temperatures. ALEXSEAL Surface Protector may be used for the protection of fully cured topcoat surfaces, glass or stainless steel surfaces during storage, assembly or transport. ALEXSEAL Surface Protector should not be left on the freshly painted surface longer than 6 months. Note: It is strongly recommended that a test application is performed to confirm suitability for each surface that requires temporary protection. Do not apply over unpainted gelcoat, polycarbonates or wood. Do not apply other ALEXSEAL products over ALEXSEAL Surface Protector.

#### Product Codes

ALEXSEAL SURFACE PROTECTOR 10KG	MZ-S8010-10
ALEXSEAL SURFACE PROTECTOR 25KG	MZ-S8010-25

# Paints & Coatings

## Auxiliary Products

### ALEXSEAL PREMIUM WASH DOWN CONCENTRATE

ALEXSEAL Premium Wash Down Concentrate is a biodegradable washing detergent designed to clean ALEXSEAL topcoats. It is neutral in PH; does not include abrasives and is free rinsing which decreases drying time. ALEXSEAL Premium Wash Down Concentrate is formulated for the marine environment. ALEXSEAL Premium Wash Down Concentrate can be used on ALEXSEAL Topcoats to achieve a well cleaned surface.

#### Product Codes

ALEXSEAL PREMIUM WASH DOWN CON- MZ-A5005-QRT  
CENTRATE QUART

### ALEXSEAL PREMIUM POLYMER SEALER

ALEXSEAL Premium Polymer Sealer is a non-abrasive synthetic sealer designed for cleaning and protecting surfaces painted with polyurethane. It is formulated with UV absorbers that will help protect the paint from exposure to the sun and improve the coatings life expectancy. Premium Polymer Sealer will remove mild stains and water spots from the surface and leave behind a protective polymer coating which will help seal the surface from the harsh elements of the marine environment. It is recommended to apply ALEXSEAL Premium Polymer Sealer every 3 to 4 months to areas that have extreme exposure to sunlight.

#### Product Codes

ALEXSEAL PREMIUM POLYMER SEALER PINT MZ-A5010-PNT

## ALEXSEAL BLENDING SOLVENT

Alexseal A5033 Blending Solvent is a product for Topcoat repairs. It is a solvent to be applied directly to the repair area or to be added to the ready mixed topcoat. The old coating will be softened which will help to connect the new coating with the old one. It will link both layers to get a smoother blending and a seamless repair.

#### Product Codes

ALEXSEAL BLENDING SOLVENT QUART MZ-A5033-QRT

## Non Slip Additive

### ALEXSEAL NON SKID ADDITIVE

ALEXSEAL Non Skid is specifically developed to achieve non-skid textures on surfaces where anti-skid properties are required. ALEXSEAL Non Skid is available in Course and Fine qualities and can be applied by spraying, brushing, rolling or sprinkling methods.

#### Product Codes

ALEXSEAL NON SKID ADDITIVE FINE 0,9KG MZ-A5003  
ALEXSEAL NON SKID ADDITIVE COARSE 0,9KG MZ-A5007

## Crack Sealer

### BURGESS CREEPY CRACKSEAL

BURGESS Creepy Crackseal is a highly penetrating resin which will work its way into the smallest cracks and penetrate wherever water is able to. BURGESS Creepy Crackseal's properties make it ideal for leaky hatches, deck lights and other troublesome areas.

#### Product Codes

BURGESS CREEPY CRACKSEAL 100ml	BS-CS-100
--------------------------------	-----------

## Wood Sealers

### BURGESS WOODSEALER

BURGESS Woodsealer is a long lasting wood treatment which contains UV blocking pigments that help to prevent degradation by the sun's rays. BURGESS Woodsealer will not crack or craze like traditional varnishes. BURGESS Woodsealer can be used on its own to leave a matt finish or over-coated using Top Gloss or Clearseal to create a gloss finish.

#### Product Codes

BURGESS WOODSEALER	BS-WS-1
BURGESS WOODSEALER	BS-WS-2.5
BURGESS WOODSEALER	BS-WS-5

## Your boat, our passion

We believe it's what others say about us that really counts! And with Seajet 033 Shogun self-polishing antifouling coming out on top of Practical Boat Owner's major independent group comparison test of 20x different antifouling products, we are proud to say that...

SEAJET 033 SHOGUN IS 'BEST ON TEST'  
(PBO, JANUARY 2016)
